

RAPHAEL AZEVEDO

Full Stack Developer
+55 (12) 99725-7918 | raphaelazevedo32@gmail.com | linkedin.com/in/raphael-azevedo32

PROFESSIONAL SUMMARY

Full Stack Developer with experience in order management, logistics, billing/invoicing, inventory, and electronic invoice (NF-e) issuance systems. Proficient in React, Next.js, NestJS, TypeScript, PostgreSQL, Oracle, Docker, AWS SQS, and system integrations with Mega/MegaStore ERP, VTEX, and external third-party services.

PROFESSIONAL EXPERIENCE

Junior Full Stack Developer <i>Datashelf</i>	Mar. 2025 – Present Hybrid / São José dos Campos, SP
- Developed and maintained Sentry, an internal management system handling order workflows, logistics, invoicing, inventory management, and NF-e issuance. - Built frontend interfaces using React, Next.js, TypeScript, Tailwind CSS, and shadcn/ui, implementing advanced filters, search functionality, modals, and operational workflows. - Engineered backend services using Node.js, NestJS, TypeORM, and RESTful APIs—including endpoints, DTOs, webhooks, cron jobs, input validation, and business logic implementation. - Authored and optimized complex SQL queries in PostgreSQL and Oracle, utilizing DBeaver for data auditing, analysis, updates, and troubleshooting. - Developed the NF-e Editor, enabling fiscal/registration data corrections, automated address autocompletion via postal code (CEP), and invoice reprocessing, significantly reducing manual rework and accelerating operational throughput. - Integrated Sentry with Mega/MegaStore ERP, VTEX, AWS SQS FIFO queues, Focus NF-e, Smart Envios, Mercocamp, and various freight/carrier APIs. - Implemented safeguards against duplicate orders and quotes, executed product migrations from EAN to SKU, and resolved data inconsistencies across integrated platforms. - Designed and built invoice synchronization pipelines featuring batch processing, retry mechanisms, timeouts, scheduled tasks, and concurrency control. - Investigated and resolved production incidents using application logs, HTTP network traces, database inspection, message queues, Docker, and Insomnia.	

EDUCATION

Associate Degree in Systems Analysis and Development <i>Anhanguera</i>	Feb. 2025 – In Progress São José dos Campos, SP
--	--

LANGUAGES & CERTIFICATIONS

English: B2 Proficiency level, certified by the Massachusetts Institute of Technology (MIT).

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, SQL, Java, HTML, CSS
Frameworks & Runtimes: React, Next.js, Node.js, NestJS, Tailwind CSS
Tools & Infrastructure: Git, GitHub, Docker, PostgreSQL, Oracle, DBeaver, Metabase, AWS SQS, Postman, Insomnia, VS Code, IntelliJ IDEA, Linux
Libraries: TypeORM, shadcn/ui, Luxon, node-cron
